Abstract

During the present studies total number of 40 catfish specimens has been collected from Indus River Sindh, Pakistan. Out of 40 specimens, 40 specimens of *bangarius bagarius* species have been recorded. 027 ♀ and 13 ♂ were recorded from Bank of the Indus River Sindh Pakistan. *Bangarius bagarius* species lives fast and rocky pools of large and medium-sized rivers, they breed in the rivers prior to the starting of the yearly flood season. They are from small to large in the size and also known as the devil catfish, dwarf goonch or goonch in common Sindhi language called Foji Khago. Catfish plays vital role in Pakistan economy.
